

We are Air Products

Air Products touches the lives of consumers around the globe in positive ways every day. With approximately 16,000 employees and operations in 50 countries, we serve customers across a wide range of industries from food and beverage to medical, energy and transportation. We supply a unique portfolio of atmospheric and process gases, equipment and services for energy, environment and emerging markets.

Founded in 1940, Air Products has built a reputation for its innovative culture, operational excellence and commitment to safety and the environment. Our passionate, talented and committed employees from diverse backgrounds are driven by Air Products' higher purpose to create innovative solutions that benefit the environment, enhance sustainability, and address the challenges facing customers, communities and the world.

<p>\$8.9 billion in sales from continuing operations</p>	<p>16,000 employees</p>	<p>50 countries</p>

Products that benefit our customers around the world

Our gases, equipment and applications expertise enable our customers in dozens of industries to improve sustainability performance by increasing productivity, producing better quality products, reducing energy use and lowering emissions.

For additional examples, see our sustainable offerings [website](#).

Our Modified Atmosphere Packaging (MAP) and Freshline® solutions extend the shelf-life of food, improve the taste, reduce waste, and help to keep production costs down.

Halia®, our advanced oxidation technology, improves fish health in aquaculture and improves water-treatment, reduces unwanted byproducts in drinking water, sludge, and volatile organic compounds (VOC) emissions from wastewater treatment plants.

We are the world's leading supplier of [liquefied natural gas \(LNG\) process technology](#) and equipment, which enables economical transport and use of stranded energy sources around the globe.

Our [oxy-fuel combustion technologies](#) are used in energy-intensive applications like cement, metals and glass manufacturing to increase production, lower fuel costs, reduce emissions and optimize efficiency.

Our [SmartFuel® hydrogen fueling station](#) technology provides complete fueling infrastructure for fuel cell vehicles, hydrogen-powered forklifts and other material handling vehicles. Hydrogen fuel can be used in many different types of transportation to eliminate or significantly reduce emissions.

We make [hydrogen](#) for refining heavier, sour crudes, increasing yields and reducing emissions for cleaner transportation fuels. Many industries such as electronics, foods, glass, chemicals and more benefit from its unique properties to improve quality, optimize performance and reduce costs.

Our gasification process provides a clean, reliable and flexible way to create [synthesis gas \(syngas\)](#) from low-value solid, liquid or gaseous feedstocks for the production of high-value products and power.
